VENTURE ASSOCIATE

Foundation Venture Capital Group · Princeton, New Jersey

Foundation Venture Capital Group ("FVCG" www.foundationventure.com) is seeking a highly motivated and talented individual to join the team as a Venture Associate. The Venture Associate will evaluate potential grants and investments in the healthcare space and manage value-added services for FVCG’s portfolio. This position is a unique opportunity to join a non-profit organization dedicated to making impact-driven investments and to help commercialize concepts that will change healthcare in the future.

Background on Foundation Venture Capital Group:
FVCG provides pre-seed funding to new health-related companies in New Jersey to help them advance toward commercialization. Its parent company, New Jersey Health Foundation ("NJHF" www.njhealthfoundation.org), funds health-related research and education programs at organizations with which it has affiliations, including Kessler Foundation, New Jersey Institute of Technology, Rutgers University, Rowan University, Princeton University and Stevens Institute of Technology. Through the Research Grant, Innovation Grant, HealthStart NJ and venture investment programs, NJHF and FVCG have put to work more than $60 million to support the healthcare ecosystem in New Jersey.

Key Responsibilities:
The Venture Associate will have responsibilities related to diligence on new funding opportunities, portfolio management and operational duties including the following:

- Assist in sourcing and completing deals through coordination with FVCG’s partner organizations.

- Conduct due diligence including evaluating the science, products, clinical need, competitive landscape, regulatory pathway, market opportunities, and determining overall business and financial attractiveness of opportunities.

- Identify key risks of an investment and recommend potential further analysis to be conducted by specialists and consultants assisting with the due diligence.

- Track portfolio companies’ financial progress and product development and pro-actively manage relationships with principal research scientists and founders of portfolio companies, including managing deliverables to achieve established goals.

- Work with principal research scientists and portfolio company founders to understand their needs, collaborate with FVCG and NJHF staff to understand the organizations’ goals and networks, and share resources with portfolio companies.

Qualifications:
The right Venture Associate candidate is a self-driven, impact-oriented professional with a broad set of interests and skills as well as a commitment to supporting health-related research, education and
commercialization. This individual has wide interests in business and the tech ecosystem, and a strong passion for people. This person can create and execute ideas successfully, is self-aware, communicates clearly, responds well to feedback, embraces change, tolerates ambiguity, and is able to work on multiple projects simultaneously.

The Venture Associate will be the point person advancing the commercialization of health-related research for a portfolio of projects within his/her portfolio. Given the health-related focus of the organization, preference will be given to individuals with a background in related areas of study and work particularly in the therapeutic, device, diagnostic and healthcare IT areas. Other qualifications for the Venture Associate position include:

- Excellent academic record, strong analytical abilities and willingness to learn new things.
- Working knowledge of health-related industries and fields of study, and preferably other interdisciplinary areas, as evidenced by an advanced post graduate degree and/or work experience with hands-on scientific research and technical experience.
- Exposure to university technology transfer, licensing, venture capital investing is preferred.
- Self-starter with a track record of going above and beyond what is asked.
- Ability to prioritize, coordinate and manage several projects simultaneously and manage a portfolio of projects and portfolio companies.
- An ability to build and maintain good relationships with colleagues, partners and entrepreneurs.
- Working experience in both academic and industry settings is preferred.
- Expertise in using databases and on-line resources to assess up-to-date market and company information is preferred.

The Venture Associate will report to the Director, Venture Commercialization and work closely with the Vice President of FVCG as well as other Venture Associates and all leadership and staff within NJHF. This is a salaried position working out of FVCG’s Princeton office.

The essential elements for this work are: passion in a vision, courage to push for change, willingness to explore new ideas, expertise to accomplish the work and tenacity to reach the desired results. If you share this passion, we want to hear from you. Tell us what excites you about this opportunity and why you are right for it.

Send your cover letter and/or resume to Christine Caruso at ccaruso@njhf.org.
